

TEAM COACH TRAINING

TCC ACCREDITATION

About Us

We offer 100% practical programs based on rigorous research and analysis. The TCC program is based on five years of meta-research, integrating wisdoms from more than 500 academic articles on team effectiveness as well as popular books and articles on team coaching.

Our Mission

Our mission is to help team leaders everywhere become brilliant team coaches. We achieve this by working with organisations directly, by supporting the development of professional team coaches, and by hosting an ongoing community of practice for all those seeking to further their learning and development.

Our Community

Our community is global and multicultural and continues to grow, with coaches from Asia, US, Africa, Europe, the Middle East, India, and Australia/NZ.

The Program

You will work with a cohort of no more than six people. The small group size enables the co-creation of a powerful and intimate learning environment. The initial program consists of 6 x 3 hour virtual sessions. You will receive in advance a copy of the course text 'The Wise Team Coach' and all the TCC materials - the manual, more than 30 online resources, games, and 10 free bMaps licences. The bMaps resources have been developed to support working with teams on their team dynamics.

And then ...

Undertake the optional stage 2 to be eligible for fast track-accreditation as a 'Practitioner' team coach with the EMCC. Fast-track usually means less than a week ...

... and join our TCC Community of Practice, with sub-communities focussed on particular areas of practice, supporting each others' ongoing development, with access to our monthly speaker series featuring experts in the field.
